

WHAT IS CLAIMED IS:

5

1. A magnetic head comprising:
a magnetoresistance film;
a flux guide guiding a signal magnetic
field from a magnetic recording medium to said
10 magnetoresistance film; and
a flux-guide regulating film aligning
magnetic domains of said flux guide into a single
magnetic domain.

15

2. The magnetic head as claimed in claim
1, wherein said flux guide is formed as a separate
20 element from said magnetoresistance film.

25

3. The magnetic head as claimed in claim
1, wherein said flux guide is formed as a part of
said magnetoresistance film.

30

4. The magnetic head as claimed in claim
1, wherein at least one of sides and surfaces of
said flux-guide regulating film is magnetically
35 connected with said flux guide.

5. The magnetic head as claimed in claim 1, wherein said flux-guide regulating film is one of a highly coercive-force film and an antiferromagnetic film.

5

6. The magnetic head as claimed in claim
10 1, wherein said flux-guide regulating film also
aligns magnetic domains of said magnetoresistance
film into a single magnetic domain.

15

7. The magnetic head as claimed in claim 1, wherein said magnetoresistance film is a magnetoresistance film of one of a spin-valve type and a tunnel-junction type.

25 8. A magnetic reproducing device
comprising:

a magnetic head including:
a magnetoresistance film;
a flux guide guiding a signal magnetic
30 field from a magnetic recording medium to said
magnetoresistance film; and
a flux-guide regulating film aligning
magnetic domains of said flux guide into a single
magnetic domain.
